Boulder, CO

EDUCATION

- **University of Colorado, Boulder** Aug 2026 — Present
M.Sc. Computer Science
- **University of Colorado, Boulder** Aug 2023 — Dec 2025
B.A. Computer Science, Philosophy minor

EXPERIENCE

- **Software Engineer Intern** May 2026 — Present
CU Anschutz mHealth Impact Lab
 - Investigated data quality issues in medical survey datasets and reported findings to research team.
 - Designed and led front-end development for a research study monitoring health statistics using Garmin data.
 - Collaborated with researchers and developers to create a full-stack application to conduct questionnaires with meeting FHIR Healthcare protocols.
 - Researched healthcare guidelines, rules, and regulations to ensure compliance with these standards, and to ensure anonymity of participants.
- **Quality Assurance Engineer** May 2024 — Dec 2024
Zonit Structured Solutions
 - Conducted quality assurance testing on power distribution and management systems, ensuring compliance with professional-grade standards.
 - Collaborated with repair mechanics to identify and document unit defects and performance issues.
 - Adapted testing protocols to accommodate evolving project requirements and timelines.

PROJECTS

- **Predicting Covid-19 Risk** Sep 2025 — Dec 2025
Python, scikit-learn
 - Developed predictive models to research individual feature effects on risk of death and ICU admittance for patients diagnosed with covid-19.
 - Presented a project report thoroughly explaining findings and research methodologies used.
- **Othello** Nov 2025 — Dec 2025
Java
 - Implemented a responsive user interface using Java Swing framework, displaying the game visually, and handling user interaction through event listeners and observers.
 - Created a comprehensive JUnit test suite to validate game logic and method coverage, ensuring code reliability through unit tests covering basic functionality, edge cases, and game rules.
- **Pocket Mechanics, Auto Part Finder** Mar 2025 — May 2025
HTML/CSS, Javascript, Docker, PostgreSQL, Node.js
 - Implemented a PostgreSQL database with vehicles and parts scraped from RockAuto's API.
 - Designed a secure user authentication system that allows users to log in, save parts, vehicles, and buy items.
 - Integrated Google Maps API to provide real-time location-based search for nearby retailers.

SKILLS

- **Languages:** Python, Javascript/Typescript, Java, C/C++, LaTeX, SQL
- **Tools:** React, Django, Next.js, Pandas, Figma, Git, NumPy, scikit-learn, matplotlib, Docker, PostgreSQL
